.NET

📂 PROJECTS

E COMMERCE WEBSITE

- I successfully designed and developed an e-commerce website, showcasing my proficiency in web development, user interface design, and e-commerce solutions.

- This website was developed from scratch using PHP, JavaScript, CSS, and MySQL.

potato leaf disease classification website

- Developed an interactive web application for classifying potato leaf diseases using machine learning. The platform utilizes a convolutional neural network (CNN) to accurately identify various leaf diseases from uploaded images, aiding farmers and agricultural professionals in early disease detection and management. Key features include user-friendly image upload, real-time prediction results, and comprehensive disease information.

🎓 EDUCATION

BSc in Computer Science Software Engineering
University of Wolverhampton
2023 – 2024

HND in Computer Science
University of West London
2021 – 2023
